

**The study of the action "a marketed Myanmar traditional medicine"
on HBV and HCV infected patients**

Dr.Lwin Ko

Red Rector, University of Traditional Medicine

In this study 13 patients infected with (HBV and HCV) are given the above selected medicine 900mg bd for 6 months, and watched for its efficacys. The results showed no side effects (100%). General well being is improved (100%), body weight gain is (90%) and viral load fall down to all patients but only one patient got HCV Real Time (PCR) below detection limit. Liver function tests (AST, ANT, Alkaline Phosphatase) were bring down (80%) of the patients in this study period. All patients didn't go into Hepatic failure and bleeding episode (Eg. Hamatamesia and malena).
